The Softer Side of Healthcare

How it works

THE TRACK

The **On The Right Track**® system has features that give you flexibility, reliable durability and ultimately greater ease of use.

- No hooks or carriers that can get stuck.
- Our curtains glide silently across the rails.
- The track can be adjusted to achieve one universal curtain height in your facility.
- Our patented track system enables our cubicle curtains to be removed and replaced in seconds.

Also available in window curtains.

MULTIPLE TEXTILE CHOICES*

Grey

Oat

Muted Indigo

Rosemary

We offer core MIP colours that meet the Canadian fire code CAN/ULC-S109-14. If you have a special design in mind, we also have the ability to source fabric from leading manufacturers to create custom curtains that meet your needs.

* Colours also available for window curtain options. Contact your local Sales Consultant for more information.

THE PATENTED RINGS

Who needs an old fashioned cubicle curtain system with noisy hooks and chains that is so time consuming and poses unnecessary liability and risk? **On The Right Track**® is uniquely different. Our patented split ring technology allows our curtains to **glide silently along our patented rail system**.

It will improve patient satisfaction and decrease disruption. Without hooks or chains, the curtain exchanges can be managed in less than one minute while standing on the ground.

LEVERAGE YOUR EXISTING TRACK

We have the ability to retrofit the **On The Right Track**® system directly into your track, or at your option, directly into your ceiling. If you like the way your tracks are set up, we can simply add on without the disruption of taking any tracks down. The possibilities are endless!

THE MODULAR PANEL SYSTEM

Traditional cubicle curtains may require you to have multiple widths and lengths of curtains for specific areas within your facility. Oftentimes, the inventory can be a headache to manage. With the **On The Right Track**® system, you can have one curtain universally throughout the whole facility! If needed, we can drop the track to make one consistent track height throughout the facility. Easy to manage, easy to change, easy to launder!

THE GRABBER®

This unique patented accessory enables you to **exchange your privacy curtains effortlessly** without the use of a ladder. With two feet on the ground, this is an invaluable tool in the world of environmental services.

Patented hookless® shower curtains

PIN DOT

Eight gauge **vinyl**, magnets, antimicrobially treated, with matching colour rings.
