

OTRT CUBICLE CURTAINS: AN INNOVATIVE MADE IN QUÉBEC SOLUTION

Prevention of nosocomial infections

THE CHALLENGE

According to the data available, the frequency of replacement of curtains dividers in establishments in Québec does not meet the recommendations of CINQ.

THE SOLUTION

The patented OTRT cubicle curtains:

- Manufactured in Montréal by a Canadian company
- Solution developed by a multidisciplinary team of ergonomists, infection prevention experts and health care professionals
- Solution implemented across over 275,000 beds in North America
- Solution adopted by 400 hospitals and care facilities in Canada, including 45 hospitals and long-term care facilities in Québec

Financial, health, patient and personnel safety benefits

- 10 times faster to change than traditional curtains
- Major increase in the frequency at which curtains are changed
- Decrease in the number of staff injuries and work accidents
- Return on investment in less than 24 months
- Uniform inventory
- Silent rail system – less patient disturbance
- Reduction of nosocomial bacteria transfers

Advantages of the OTRT Curtains*

- Installation can be done in both new and existing establishments
- Suitable for installation on existing tracks – no additional holes, no dust
- Adjustable curtains suitable for all ceiling heights
- 68-inch curtain panels – facilitating the removal-to-laundry-to-install cycle

* Shower curtains also available
Solution also widely used across pediatric hospitals
